2009-2010

5th Grade College Planning: \$945

Students are given the opportunity to visit college campuses, helping them make the connection between their own education and future possibilities. Grant funds will provide all 5th grade students a day of touring a local college campus. They will meet with teachers, administrators and students. They will visit lecture halls, dorm rooms, the library and gym. The goal is to enlarge the world-view of students, encourage them to set goals and to understand the value of what an education means to their future.

2008-2009

After-School Enrichment: \$10,000

The After-School Enrichment program is for students who would not otherwise have exposure to the types of experiences that promote learning, such as the arts, or extended school support. The program will include a Homework Club for students needing academic support. All students will be invited to participate in a series of sessions of enrichment classes. Through the use of hands-on activities that focus on the arts and culture, student will have the chance to celebrate diversity, explore their interest in the arts and make strides crucial to becoming life-long learners.
