

## Raleigh Hills K-8

**2010-2011**

**Targeting With Technology: \$6,854**

**Funding provided through the BEF Building STEAM 4 All Program**

Targeting with Technology is a summer program that will serve second through fourth grade students who are struggling to perform at grade level in reading and mathematics. Highly skilled classroom teachers and a technology specialist will provide an engaging curriculum infused with technology. The goals of the program are to build skill knowledge and to prevent regression in both reading and math over the summer months.

**2009-2010**

**Hands-On Science Presentations: \$1,000**

Grant funds will be used to bring hands-on science presentations to the school throughout the year. Rather than spending valuable learning time on the bus, the learning experiences will come to the students. OMSI and Audubon Society of Portland will come with interactive presentations such as Bug Me!, Befriend a Bird of Prey and Amphibians and Reptiles.

**2008-2009**

**ELL's Homework Club: \$770**

As indicated by research, English Language Learners (ELL) often require support beyond that which can feasibly be provided in the regular classroom setting. The purpose of this project is to provide at-risk ELL students with explicit instruction in organizational skills, and provide a study center for them to receive assistance with homework assignments, and help them develop their ability to independently complete assignments.

**2006-2007**

**Water Study: \$1,000**

Fifth grade students will have the opportunity to study various water systems through hands-on activities, demonstrations and field activities. Topics of study will be molecular structure and properties of water, water cycle, Oregon weather and climate, watersheds, ground water, wetlands and water quality. Students will visit a watershed and wastewater treatment facility in Cannon Beach, and study mountains, glaciers and rivers on a trip to Mt. St. Helens.

**BEF After-the-Bell Student Success Award: \$500**

Funding provided for after-school activities for middle school students.
