

Terra Nova High School

2010-2011

Terra Nova Community Farm -- \$4,000

The Terra Nova Community Farm Summer Program will give students the opportunity to take ownership over a small, community oriented and ecologically sustainable business. The program will give at-risk students a safe structured environment to spend their summer. The student run farm will supply local families with organic produce. Students will learn about plant biology through seeding, cultivating and harvesting crops. They will learn mathematics as they divide the daily harvest into equal portions and in the overall management of the farm.
